114. CuraproxENZYCAL 950/ 75MI

Price: KSh1,206

SKU: Not specified

Stock Status: 40 in stock

Categories: Health Care, Conditions, Oral Care

Description:

Extra mild. Mint flavoured

Normal sodium fluoride content: 950 ppm. Double protection against decay thanks to sodium fluoride and enzymes – to boost the natural, protective power of your saliva. RDA 30: very gentle. Suitable for the whole family – for 6 years and upwards. Made in Switzerland.

Mild is now strong: cleans without injuring and strengthens with enzymes.

Mint flavoured

Everything that might possibly be harmful has been eliminated. Instead, it supports the protective function of the saliva. EnzyCal contains no aggressive substances. The aggressive foaming agent, sodium lauryl sulphate (SLS) found in most toothpastes has been replaced by a neutral one. Essential oils such as menthol have been reduced to a minimum. Even the RDA is low. In contrast, EnzyCal has three enzymes that are already present in saliva – this miracle fluid in oral hygiene can even repair dental enamel. The saliva with its protective and repair functions is further boosted by the enzymes in EnzyCal – which also prevents mouth dryness. EnzyCal thus ensures healthy teeth, gums and mouth. It also tastes just as mild as it actually is – so mild that it even helps combat mouth ulcers.

No foaming agent SLS: gentle on the mouth

Contains enzymes: boosts natural saliva protection, promotes re-calcification and protects against dry mouth

Enamel-friendly: practically free of abrasion (RDA 30)

Caries protection from readily available sodium fluoride

Pleasantly mild taste

Noticeably less plaque and tartar

950 ppm Sodium Fluoride

Suitable also in combination with a sonic toothbrush

Description:

The rather hard toothbrush

For people who are more used to a slightly firmer toothbrush, the CS 1560 soft is the ideal introduction to the gentleness of Curaprox. Curen®-filaments, 0.15 mm in diameter.

Important: Colours vary

Curaprox toothbrushes not only prevent brushing damages, but also break up and remove plaque perfectly.

Curen®-bristles are stiffer than nylon and remain just as stable in the mouth as when they are dry. These properties make it possible to produce toothbrushes with a large number of ultrafine bristles.

Curaprox CS toothbrushes break up und remove plaque more thoroughly – thanks to the extremely dense bristles.

Free from harmful substances such as bisphenol A (BPA), phthalates or azo dyes.
